PACKAGING GUIDELINES

1. Choose pallets strong enough to support the load of the product.
****DO NOT USE BROKEN PALLETS****
2. Choose pallets large enough to prevent overhang of product.
3. Use top/bottom load protectors (corrugated fiberboard or heavy paperboard).
4. Properly wrap the entire product to prevent damage (i.e. paint, dents, scratches, etc.). *****Pallet box or crating is the preferred method*****

NOTE: JUST SHRINK WRAPPING THE PRODUCT IS NOT ACCEPTABLE

5. Properly secure product to pallet (banding, bolting, etc.)
*****Use corner/edge boards to protect corners when banding product*****

It is the shipper's responsibility to protect the shipment from natural vibration and forces that occurs in transit, use proper cushioning, blocking, bracing, banding, etc.
